

Instructions for using the Wireless microphone in the MPR updated 1/27/20

There is now a key pad on the wall by the large screen that looks like this.

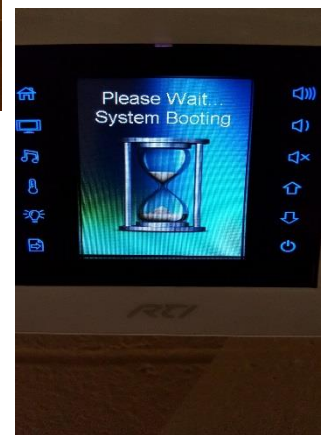

The code is 1966 (for when St. Gabriel began as a Parish.) Please enter 1966 and when you do the screen below will appear.

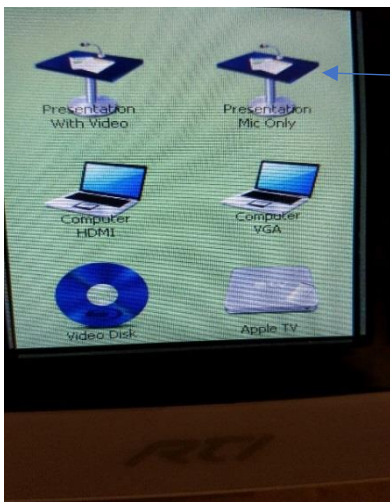

Push green button **firmly for 3 seconds** for power on.

After you push the green power on button, the screen to the right will appear and it will say "Please wait system booting." **It takes 90 seconds to power up.** At the end of the 90 seconds the screen below will appear.

Push the top right Icon which says "Presentation Mic only." We now have a Lap Top cabinet that is right below the key pad and will stay there permanently. In that cabinet on the top right shelf is a wireless microphone. Just turn the button on the bottom of the microphone to on (red light will turn on when microphone is on) as shown below and you are all set to go!

To turn the system off please push the small blue round button at the bottom right of key pad. A second screen will appear. Please push the red circle button on that screen. Everything will power down and turn off for you. Please turn the microphone off by turning the button to off on the bottom of microphone and return to top right shelf of cabinet.
